### N10 - Specification:

### 'FGR...M' Single Sided Freestanding Garment Rack with Mesh top shelf and Shoe rack:

Dimensions: 480mm deep x 1750mm high.

**Leg frames:** Constructed of 30x30 box section with mitred joints, ground and polished then powder coated to finish. Pre drilled to take hanging rail, top shelves and shoe racks, with plastic end caps, concealed fix floor fixing brackets or adjustable feet.

**Mesh Top Shelves:** Constructed using powder coated 30x30 formed angle support framework into which 50mm x 25mm mesh is fitted, simply bolts into uprights of the leg frames, with 25mm diameter chrome hanging rail mounted underneath.

**Mesh Shoe Racks:** Constructed using powder coated 30x30 formed angle support framework into which 50mm x 25mm mesh is fitted, simply bolts into the legs under the bench seat units.

### FINISH:

**The Steel / Metal legs and support frames:** Welded in jigs for dimensional consistency, welds are ground flush and all steel cleaned using a vapour immersion degreaser, then electro statically powder coated to thickness of approx 60-80 microns, baked in an industrial oven and wrapped for protection during transport.

**Electro Zinc Plating:** If the bench seats are for use in humid / wet situations or where there is risk of exposure to chemicals like chlorine / bromine etc, please ensure you request Electro Zinc Plating (additional cost applicable), and we will apply the plating after degreasing and before the final polyester powder coated colour finish is applied, OR Stainless Steel which will have a natural unpainted finish.
